

The Mississippi State Department of Health (MSDH) is the state agency responsible for administering the Title V Program in Mississippi. MCH Block Grant funds are allocated in the MSDH central office to the Office of Women's Health, and the Office of Child/Adolescent Health. The Children's Medical Program, which is the program of services for Children With Special Health Care Needs, is located organizationally within Health Services (HS), which is responsible for all maternal and child health functions. These two HS Offices provide services for the three major populations targeted by the MCH Block Grant: pregnant women, infants, children and adolescents, and children with special health care needs. Health Services is also responsible for administering the statewide Family Planning program and the Women, Infants and Children Supplemental Food Program (WIC).
